ALERT

Categories “High,” “Moderate,” and “Low” for scales are no longer included on the report. If districts or schools need results on these categories, please contact your Technical Advisor.

This report provides the detailed results for each question from the 2019-20 *California Healthy Kids Survey* (CHKS) for schools within the district. The CHKS, along with its two companion surveys—the *California School Staff Survey* (CSSS) and the *California School Parent Survey* (CSPS)—form the California Department of Education’s *California School Climate, Health, and Learning Survey* (CalSCHLS) System. CalSCHLS is the largest, most comprehensive effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, stakeholder engagement, and youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major school-related domains and constructs assessed by CalSCHLS. Appendix I lists the schools that administered the survey in the district and their response rates; Appendix II provides more information about CHKS questions.

These surveys grew out of the California Department of Education’s (CDE) commitment to helping schools promote the successful cognitive, social, emotional, and physical development of all students; create more positive, engaging school environments; and ensure college and career readiness. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the CalSCHLS website (calschls.org), including *Helpful Resources for Local Control and Accountability Plans* (calschls.org/docs/lcap_cal_schls.pdf). The California Safe and Supportive Schools website (californiaS3.wested.org) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS Regional Centers offer a Data Workshop to help identify local needs and develop action plans to meet those needs, including a *Listening to Students Workshop* for involving student voice in the process (see below).

THE SURVEY

CDE has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention,

and health programs. Appendix II is a brief guide to key CHKS Core Module indicators designed to help survey users more easily understand and interpret their findings.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The secondary-school CHKS consists of a required general Core Module and a series of optional, supplementary topic-focused modules that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As summarized in Appendix II, the Core Module consists of key questions, identified by an expert advisory committee, that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, college and career readiness, positive development, and well-being. The majority of the questions are school-specific, including the following indicators:

- student grades, truancy, attendance, academic motivation, and school connectedness, as indicators of engagement;
- developmental supports (protective factors) that promote positive academic, social, and emotional outcomes: experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school;
- perceived school safety, bullying, and victimization; and
- violence perpetration, substance use, and crime-related behavior (e.g., weapons possession).

The Core Module also assesses the scope and nature of substance use and includes two key indicators of mental health: chronic sadness and contemplation of suicide. These questions provide insight into important barriers to learning and development.

A wide range of demographic questions help districts identify and address the needs of significant and vulnerable student subgroups, including those required to be included in LCAP efforts. These subgroups include race/ethnicity, gender, and socioeconomic status; homeless and foster status; and English language proficiency.

What's New? For 2018-19, the following improvements were made to the Core Module:

- Added a sleep duration question to help assess nighttime sleep quality
- Added the high school suicide ideation question to the middle school survey
- Modified wording of two e-cigarette questions about perceived harm from use
- Added “Juul” as an example on the e-cigarette use questions

In 2019-20, questions were added or modified to assess opioid use, tranquilizer use, exposure to second-hand smoke or vapor at school, vape quitting attempts, and knowledge of school policies banning tobacco use and vaping on school property.

School Climate Module (Supplementary)

To further support school improvement efforts and the LCAP process, a supplementary School Climate Module is available. It provides additional data on student academic mindset, school academic supports, discipline/order, supports for social-emotional learning, bullying prevention, peer relationships, respect for diversity, and the quality of the physical environment (calschls.org/survey-administration/downloads/#ssm_sc). These questions are also included in the staff survey to provide a more comprehensive picture of stakeholder perceptions and how the perceptions of students and staff differ from each other.

Social Emotional Health Module (Supplementary)

The Social Emotional Health Module (SEHM) greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-emotional capacities linked to student mental health and well-being, academic success, and college and career readiness. It includes 56 items that capture core adolescent psychological assets. The combination of the SEHM and Core Module yields a comprehensive set of data to inform decisions about mental health and social-emotional learning programs.

SURVEY ADMINISTRATION AND SAMPLE

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Each student's participation was voluntary, anonymous, and confidential.

- Table A1.1 describes the target sample of students and the final number and percent of students who completed the survey (the participation response rate).
- Appendix I lists all the secondary schools in the district that were eligible to participate in the survey and the percentage of their enrolled students that completed the survey (included in the district report).

PUBLIC ONLINE DATA DASHBOARD

The most recent state representative and district CHKS results can be examined on the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard/). The dashboard can be used to graphically display statewide and district key indicators from the Core and School Climate Module, trends over time, and disparities in survey outcomes across subgroups. Subgroup differences by gender, race/ethnicity, parental education, parent military status, homeless status, afterschool participation, gender identity, and sexual orientation can be examined. In addition, results can be displayed for English learners, free and reduced-priced meal eligible students, and foster youth – three important LCAP priority subgroups. In addition to displaying results interactively on the web, dashboard results can be exported as Image and PDF files for dissemination. District data are publicly posted on the dashboard by the end of November of the year following survey administration.

***New in 2019!* EXPLORE RESULTS ON THE DISTRICT CALSCHLS DATA DASHBOARD**

Districts may purchase a two-year subscription to a password protected, private data dashboard that displays up to seven years of CalSCHLS data at the district level and individual school level. The dashboard provides designated staff with graphical data displays for the district as a whole, for all schools in the district on the same page to enable comparisons across schools, and for a single, individual school. At both the district and school level, viewers can:

- compare their data with district and state averages;
- make comparisons across subgroups such as race/ethnicity, sexual orientation, gender identity, and afterschool participation; and
- examine data trends over time overall and by subgroup.

Viewers at both the district level and the school level have the option to download data displays as a PDF document which can be shared with stakeholders.

THE REPORT

The report tables, organized by topic, provide the percentage of students that responded to each question response option by grade level.

Racial/Ethnic and Gender Results

In this report, summary tables provide key findings (e.g., safety, harassment, developmental supports, school connectedness) disaggregated by race/ethnic categories and gender. Districts can subscribe to the District CalSCHLS data dashboard to disaggregate all their CHKS results by the race/ethnicity or gender of students or by other demographic categories.

UNDERSTANDING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. These include changes that occur in survey content, administration, and/or sample characteristics between administrations. The following are a few of the key issues that should be kept in mind.

Representativeness

Among the most important factors affecting the quality of survey results is the level and type of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70 percent. One indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the student enrollment. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

CalSCHLS.org contains numerous guidebooks and other resources for using and understanding survey results.

- CHKS **factsheets** analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level (calschls.org/resources/factsheets/).
- *Assessing School Climate* describes the value of the CalSCHLS student, staff, and parent surveys for assessing school climate, listing constructs and individual indicators (data.calschls.org/resources/Cal-SCHLS_AssessingClimate2013-14.pdf).
- *Making Sense of School Climate* provides a discussion of CalSCHLS survey items that relate to school climate (data.calschls.org/resources/S3_schoolclimateguidebook_final.pdf).

- ***Using CalSCHLS to Assess Social-Emotional Learning and Health*** describes how the CHKS Core and SEHM module provide a comprehensive profile of student social-emotional competency (learning) and health, and the related supports schools provide, including questions aligned with the framework developed by the Collaborative for Academic, Social, and Emotional Learning (CASEL) (data.calschls.org/resources/CalSCHLS_AssessSELH.pdf). The staff survey provides data on the perception of adults in the school on social-emotional service needs and provision.
- ***Helpful Resources for Local Control and Accountability Plans*** describes how survey items align with LCAP priorities and indicators (calschls.org/docs/lcap_cal_schls.pdf). Also available is an LCAP-related PowerPoint presentation (calschls.org/site/assets/files/1036/cal-schls-lcap_schoolclimatev6-1.pptx).
- The ***School Climate Connection Newsletter*** provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on calschls.org/about.
- CDE's **California Safe and Supportive Schools** website (CaliforniaS3.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.
- The **CalSCHLS Item Crosswalk** (calschls.org/resources/#resources_and_tools) is a handy table listing all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found, to assist in the comparison of findings among students, staff, and parents.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous improvement. The following describes some additional steps you should take and some custom services (additional fees apply) available from the CalSCHLS Regional Centers. These will help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

Engage students, parents, and school/community stakeholders in reviewing and exploring the meaning of the results. Obtain their input into how the school might better meet the identified needs. Engage them in developing a detailed action plan to guide school/community collaborative efforts. This communicates to stakeholders that you value their input into how to improve the school/community and gives them an opportunity for meaningful participation.

As part of this process, it is highly recommended that you conduct a structured *Listening to Students Workshop* designed to explore with students—as staff observe—the meaning of survey results and obtain student input on how to address the needs identified by the survey. WestEd staff also can conduct a *Data Workshop* designed to identify local needs based on the survey results and engage adult stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS Regional Center 888.841.7536 or email CalSCHLS@wested.org.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the context of the following sources of related data.

- **Staff and Parent Surveys.** If your school district has administered the CalSCHLS school staff and parent surveys, obtain these results and compare them to those provided by students. It is important to determine how consistent are student, staff, and parent perceptions and experiences. To facilitate these comparisons, the CalSCHLS Item Crosswalk (calschls.org/resources/#resources_and_tools) lists all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found. If your district did not administer these companion surveys, urge them to do so next time.
- **Elementary CHKS Results.** Examine how the results from 9th and 11th graders compare with those from 5th and 7th graders if your district also administered the CHKS at these school levels. The elementary, middle, and high school surveys contain common indicators that will enable you to gain a sense of the developmental trajectory in these indicators and explore what programs at the elementary and middle school levels might help mitigate problems that are evident among older students.
- **Other Data.** Examine how the results compare with other youth data collected within the district that relate to the variables assessed. Other relevant school-related data include discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.
- **Similar District and Statewide Results.** The results from the biennial state administration of the CHKS, which provide representative state norms, can be downloaded from the CalSCHLS website (data.calschls.org/resources/Biennial_State_1517.pdf) or examined on the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard/). If there is a school district that you consider similar to your own, you can also check to see if they have administered the survey and download the results for comparison (calschls.org/reports-data/search-lea-reports/). How you compare to state and district results can provide some context for your results, but the most important consideration is what your own results say about the students in your school/community.

Data Workshop

To assist in your review of the survey results, you can request your CalSCHLS Regional Center to conduct a structured, customized *Data Workshop*. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS Regional Center (888.841.7536) or email calschls@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services are available through the CalSCHLS Regional Centers to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports and School Climate Report Cards

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school. Two types of reports are available:

- A full report with all the survey results
- A short, user-friendly, graphic **School Climate Report Card** that provides results across seven domains of school climate and provides an overall **School Climate Index** score based on those domains (calschls.org/reports-data/#slcr)

District School Climate Report Card

For districts that survey all their schools, a district-level School Climate Report Card can be requested. This is a powerful, useful tool for guiding efforts to meet the school climate and pupil engagement priorities for the Local Control and Accountability Plan.

Disaggregated Reports

The staff of the CalSCHLS Regional Centers can produce full reports that look at how results vary by demographic subgroups (e.g., race/ethnicity), or by other characteristics of youth, such as those who are low in academic motivation compared to those who are high. This can be valuable for identifying what subgroups need to be targeted with what resources and programs. Given the LCAP requirement that districts identify and address the needs of underserved subgroups, doing this would be a natural next step for addressing subgroup disparities.

Additional Analysis of Data

The complete dataset is available electronically for additional analysis (CalSCHLS.org/reports-data). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of students and across schools within a district. You can also request an analysis by WestEd staff of any topic of interest.

Add Questions to Your Next Surveys

Determine what additional information is needed from students to guide school improvement efforts and add questions to your next CHKS, staff, or parent surveys. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about survey planning or technical assistance in understanding survey results and developing effective action plans to address identified needs, call the CalSCHLS helpline (888.841.7536) or email CalSCHLS@wested.org.

Core Module Results

1. Survey Sample

Table A1.1

Student Sample for Core Module

		NT ^A
<i>Student Sample Size</i>		
Target sample		70
Final number		70
Response Rate		100%

Note: ^ANT includes continuation, community day, and other alternative school types.

2. Summary of Key Indicators

Table A2.1

Key Indicators of School Climate and Student Well-Being

	NT %	Table
School Engagement and Supports		
School connectedness [†]	56	A4.5
Academic motivation [†]	66	A4.5
Chronic truancy (twice a month or more often) [§]	13	A4.2
Caring adult relationships [‡]	63	A4.5
High expectations [‡]	67	A4.5
Meaningful participation [‡]	26	A4.5
Facilities upkeep [†]	68	A4.12
Promotion of parent involvement in school [†]	52	A4.5
School Safety		
School perceived as very safe or safe	68	A5.1
Experienced any harassment or bullying [§]	28	A5.2
Had mean rumors or lies spread about you [§]	33	A5.3
Been afraid of being beaten up [§]	4	A5.3
Been in a physical fight [§]	17	A5.4
Seen a weapon on campus [§]	12	A5.6
Substance Use and Physical/Mental Health		
Current alcohol or drug use [¶]	48	A6.5
Current marijuana use [¶]	45	A6.5
Current binge drinking [¶]	12	A6.5
Very drunk or “high” 7 or more times, ever	39	A6.7
Been drunk or “high” on drugs at school, ever	36	A6.9
Current cigarette smoking [¶]	1	A7.3
Vaping [¶]	28	A7.3
Sleep deprivation (less than 8 hours)	76	A8.2
Experienced chronic sadness/hopelessness [§]	48	A8.4
Considered suicide [§]	24	A8.5

Notes: Cells are empty if there are less than 10 respondents.

[†]Average percent of respondents reporting “Agree” or “Strongly agree.”

[‡]Average percent of respondents reporting “Pretty much true” or “Very much true.”

[§]Past 12 months.

[¶]Past 30 days.

3. Demographics

Table A3.1

Gender of Sample

	NT %
Male	54
Female	46

Question HS/MS A.4: What is your gender?

Note: Cells are empty if there are less than 10 respondents.

Table A3.2

Hispanic or Latino

	NT %
No	64
Yes	36

Question HS/MS A.6: Are you of Hispanic or Latino origin?

Note: Cells are empty if there are less than 10 respondents.

Table A3.3

Race

	NT %
American Indian or Alaska Native	0
Asian	5
Black or African American	17
Native Hawaiian or Pacific Islander	8
White	27
Mixed (two or more) races	43

Question HS/MS A.7: What is your race?

Note: Cells are empty if there are less than 10 respondents.

Table A3.4
Living Situation

	NT %
A home with one or more parent or guardian	94
Other relative's home	3
A home with more than one family	1
Friend's home	0
Foster home, group care, or waiting placement	0
Hotel or motel	0
Shelter, car, campground, or other transitional or temporary housing	0
Other living arrangement	1

Question HS/MS A.9: What best describes where you live? A home includes a house, apartment, trailer, or mobile home.

Note: Cells are empty if there are less than 10 respondents.

Table A3.5
Highest Education of Parents

	NT %
Did not finish high school	7
Graduated from high school	27
Attended college but did not complete four-year degree	17
Graduated from college	36
Don't know	13

Question HS/MS A.10: What is the highest level of education your parents or guardians completed? (Mark the educational level of the parent or guardian who went the furthest in school.)

Note: Cells are empty if there are less than 10 respondents.

Table A3.6***Free or Reduced Price Meals Eligibility***

	NT %
No	38
Yes	45
Don't know	17

Question HS/MS A.12: Do you receive free or reduced-price lunches at school? (Receiving free or reduced-price lunches means that lunch at school is provided to you for free or you pay less for it.)

Note: Cells are empty if there are less than 10 respondents.

Table A3.7***Language Spoken at Home***

	NT %
English	90
Spanish	7
Mandarin	0
Cantonese	0
Taiwanese	0
Tagalog	1
Vietnamese	0
Korean	0
Arabic	0
Other	1

Question HS/MS A.13: What language is spoken most of the time in your home?

Note: Cells are empty if there are less than 10 respondents.

Table A3.8
English Language Proficiency – All Students

	NT %
How well do you... understand English?	
Very well	94
Well	6
Not well	0
Not at all	0
speak English?	
Very well	91
Well	7
Not well	1
Not at all	0
read English?	
Very well	91
Well	7
Not well	1
Not at all	0
write English?	
Very well	85
Well	10
Not well	4
Not at all	0
English Language Proficiency Status	
Proficient	87
Not proficient	13

Question HS/MS A.14-17: How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level (“Not at all” (1); “Not well” (2); “Well” (3); and “Very well” (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as “Proficient” or “Not Proficient” based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.9***English Language Proficiency – Students Speaking a Language Other Than English at Home***

	NT %
<i>How well do you...</i>	
understand English?	
Very well	
Well	
Not well	
Not at all	
speak English?	
Very well	
Well	
Not well	
Not at all	
read English?	
Very well	
Well	
Not well	
Not at all	
write English?	
Very well	
Well	
Not well	
Not at all	
<i>English Language Proficiency Status</i>	
Proficient	
Not proficient	

Question HS/MS A.13-17: What language is spoken most of the time in your home?... How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level (“Not at all” (1); “Not well” (2); “Well” (3); and “Very well” (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as “Proficient” or “Not Proficient” based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.10***Number of Days Attending Afterschool Program***

	NT %
I do not attend my school's afterschool program	97
1 day	1
2 days	0
3 days	0
4 days	0
5 days	1

Question HS/MS A.19: How many days a week do you usually go to your school's afterschool program?

Note: Cells are empty if there are less than 10 respondents.

Table A3.11***Military Connections***

	NT %
No	89
Yes	10
Don't know	1

Question HS/MS A.11: Is your father, mother, or guardian currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)?

Note: Cells are empty if there are less than 10 respondents.

Table A3.12
Sexual Orientation

	NT %
Straight (not gay)	80
Gay or Lesbian	1
Bisexual	9
I am not sure yet	1
Something else	4
Decline to respond	4

Question HS/MS A.18: Which of the following best describes you?

Note: Cells are empty if there are less than 10 respondents.

Table A3.13
Gender Identity

	NT %
No, I am not transgender	94
Yes, I am transgender	3
I am not sure if I am transgender	1
Decline to respond	1

Question HS/MS A.5: Some people describe themselves as transgender when their sex at birth does not match the way they think or feel about their gender. Are you transgender?

Note: Cells are empty if there are less than 10 respondents.

4. School Performance, Supports, and Engagement

Table A4.1

Grades, Past 12 Months

	NT %
Mostly A's	3
A's and B's	24
Mostly B's	9
B's and C's	35
Mostly C's	13
C's and D's	9
Mostly D's	1
Mostly F's	6

Question HS/MS A.20: During the past 12 months, how would you describe the grades you mostly received in school?

Note: Cells are empty if there are less than 10 respondents.

Table A4.2

Truancy, Past 12 Months

	NT %
0 times	69
1-2 times	13
A few times	3
Once a month	1
Twice a month	1
Once a week	1
More than once a week	10

Question HS/MS A.23: During the past 12 months, about how many times did you skip school or cut classes?

Note: Cells are empty if there are less than 10 respondents.

Table A4.3***Absences, Past 30 Days***

	NT %
I did not miss any days of school in the past 30 days	25
1 day	20
2 days	17
3 or more days	38

Question HS/MS A.21: In the past 30 days, how often did you miss an entire day of school for any reason?

Note: Cells are empty if there are less than 10 respondents.

Table A4.4***Reasons for Absence, Past 30 Days***

	NT %
Does not apply; I didn't miss any school	21
Illness (feeling physically sick), including problems with breathing or your teeth	63
Were being bullied or mistreated at school	1
Felt very sad, hopeless, anxious, stressed, or angry	13
Didn't get enough sleep	28
Didn't feel safe at school or going to and from school	1
Had to take care of or help a family member or friend	9
Wanted to spend time with friends	3
Used alcohol or drugs	4
Were behind in schoolwork or weren't prepared for a test or class assignment	7
Were bored or uninterested in school	16
Had no transportation to school	13
Other reason	24

Question HS/MS A.22: In the past 30 days, did you miss a day of school for any of the following reasons? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table A4.5***School Environment, School Connectedness, Academic Motivation, and Promotion of Parent Involvement Scales***

	NT %	Table
Total school supports	52	
Caring adults in school [‡]	63	A4.6
High expectations-adults in school [‡]	67	A4.7
Meaningful participation at school [‡]	26	A4.8
School connectedness [†]	56	A4.9
Academic motivation [†]	66	A4.10
Promotion of parent involvement in school [†]	52	A4.11

Notes: Cells are empty if there are less than 10 respondents.

[†]*Scales are based on average of respondents reporting “Agree” or “Strongly agree.”*

[‡]*Scales are based on average of respondents reporting “Pretty much true” or “Very much true.”*

Table numbers refer to tables with item-level results for the survey questions that comprise each scale.

Table A4.6***Caring Relationships Scale Questions***

	NT %
Caring adults in school	
<i>Average reporting “Pretty much true” or “Very much true”</i>	63
<i>At my school, there is a teacher or some other adult... who really cares about me.</i>	
Not at all true	13
A little true	29
Pretty much true	33
Very much true	25
<i>who notices when I’m not there.</i>	
Not at all true	13
A little true	26
Pretty much true	26
Very much true	35
<i>who listens to me when I have something to say.</i>	
Not at all true	10
A little true	19
Pretty much true	38
Very much true	33

Question HS/MS A.37, 39, 41: At my school, there is a teacher or some other adult... who really cares about me... who notices when I’m not there... who listens to me when I have something to say.

Note: Cells are empty if there are less than 10 respondents.

Table A4.7***High Expectations Scale Questions***

	NT %
High expectations-adults in school	
<i>Average reporting “Pretty much true” or “Very much true”</i>	67
<i>At my school, there is a teacher or some other adult... who tells me when I do a good job.</i>	
Not at all true	12
A little true	21
Pretty much true	31
Very much true	37
<i>who always wants me to do my best.</i>	
Not at all true	6
A little true	18
Pretty much true	38
Very much true	38
<i>who believes that I will be a success.</i>	
Not at all true	16
A little true	25
Pretty much true	28
Very much true	32

Question HS/MS A.38, 40, 42: At my school, there is a teacher or some other adult... who tells me when I do a good job... who always wants me to do my best... who believes that I will be a success.

Note: Cells are empty if there are less than 10 respondents.

Table A4.8
Meaningful Participation Scale Questions

	NT %
Meaningful participation at school	
<i>Average reporting “Pretty much true” or “Very much true”</i>	26
<i>At school,...</i>	
I do interesting activities.	
Not at all true	32
A little true	38
Pretty much true	19
Very much true	12
I help decide things like class activities or rules.	
Not at all true	52
A little true	23
Pretty much true	16
Very much true	9
I do things that make a difference.	
Not at all true	34
A little true	35
Pretty much true	19
Very much true	12
I have a say in how things work.	
Not at all true	52
A little true	24
Pretty much true	16
Very much true	7
I help decide school activities or rules.	
Not at all true	62
A little true	19
Pretty much true	10
Very much true	9

Question HS/MS A.43-47: At school,... I do interesting activities... I help decide things like class activities or rules... I do things that make a difference... I have a say in how things work... I help decide school activities or rules.

Note: Cells are empty if there are less than 10 respondents.

Table A4.9
School Connectedness Scale Questions

	NT %
School connectedness	
<i>Average reporting “Agree” or “Strongly agree”</i>	56
I feel close to people at this school.	
Strongly disagree	19
Disagree	7
Neither disagree nor agree	36
Agree	32
Strongly agree	6
I am happy to be at this school.	
Strongly disagree	19
Disagree	3
Neither disagree nor agree	19
Agree	51
Strongly agree	9
I feel like I am part of this school.	
Strongly disagree	14
Disagree	10
Neither disagree nor agree	32
Agree	33
Strongly agree	10
The teachers at this school treat students fairly.	
Strongly disagree	9
Disagree	1
Neither disagree nor agree	22
Agree	29
Strongly agree	39
I feel safe in my school.	
Strongly disagree	6
Disagree	1
Neither disagree nor agree	22
Agree	45
Strongly agree	26

Question HS/MS A.24-28: How strongly do you agree or disagree with the following statements?... I feel close to people at this school... I am happy to be at this school... I feel like I am part of this school... The teachers at this school treat students fairly... I feel safe in my school.

Note: Cells are empty if there are less than 10 respondents.

Table A4.10
Academic Motivation Scale Questions

	NT %
Academic motivation	
<i>Average reporting “Agree” or “Strongly agree”</i>	66
I try hard to make sure that I am good at my schoolwork.	
Strongly disagree	7
Disagree	6
Neither disagree nor agree	15
Agree	43
Strongly agree	29
I try hard at school because I am interested in my work.	
Strongly disagree	9
Disagree	7
Neither disagree nor agree	30
Agree	36
Strongly agree	17
I work hard to try to understand new things at school.	
Strongly disagree	7
Disagree	0
Neither disagree nor agree	25
Agree	45
Strongly agree	23
I am always trying to do better in my schoolwork.	
Strongly disagree	7
Disagree	3
Neither disagree nor agree	17
Agree	51
Strongly agree	22

Question HS/MS A.33-36: How strongly do you agree or disagree with the following statements?... I try hard to make sure that I am good at my schoolwork... I try hard at school because I am interested in my work... I work hard to try to understand new things at school... I am always trying to do better in my schoolwork.
Note: Cells are empty if there are less than 10 respondents.

Table A4.11***Promotion of Parent Involvement Scale Questions***

	NT %
Promotion of parent involvement in school	
<i>Average reporting “Agree” or “Strongly agree”</i>	52
Teachers at this school communicate with parents about what students are expected to learn in class.	
Strongly disagree	10
Disagree	4
Neither disagree nor agree	30
Agree	42
Strongly agree	13
Parents feel welcome to participate at this school.	
Strongly disagree	12
Disagree	1
Neither disagree nor agree	43
Agree	36
Strongly agree	7
School staff take parent concerns seriously.	
Strongly disagree	13
Disagree	1
Neither disagree nor agree	28
Agree	41
Strongly agree	17

Question HS/MS A.30-32: How strongly do you agree or disagree with the following statements?... Teachers at this school communicate with parents about what students are expected to learn in class... Parents feel welcome to participate at this school... School staff take parent concerns seriously.

Note: Cells are empty if there are less than 10 respondents.

Table A4.12***Quality of School Physical Environment***

	NT %
My school is usually clean and tidy.	
Strongly disagree	7
Disagree	0
Neither disagree nor agree	25
Agree	48
Strongly agree	20

Question HS/MS A.29: How strongly do you agree or disagree with the following statements?... My school is usually clean and tidy.

Note: Cells are empty if there are less than 10 respondents.

5. School Violence, Victimization, and Safety

Table A5.1

Perceived Safety at School

	NT %
Very safe	26
Safe	42
Neither safe nor unsafe	28
Unsafe	1
Very unsafe	3

Question HS A.105/MS A.92: How safe do you feel when you are at school?

Note: Cells are empty if there are less than 10 respondents.

Table A5.2***Reasons for Harassment on School Property, Past 12 Months***

	NT %
Race, ethnicity, or national origin	
0 times	85
1 time	4
2 or more times	10
Religion	
0 times	94
1 time	3

1 time	4
2 to 3 times	3
4 or more times	4

Question HS A.118/MS A.106: During the past 12 months, how many times on school property have you... seen someone carrying a gun, knife, or other weapon?

Note: Cells are empty if there are less than 10 respondents.

6. Alcohol and Other Drug Use

Table A6.1

Summary Measures of Level of AOD Use and Perceptions

	NT %	Table
Lifetime illicit AOD use to get “high” [#]	67	A6.2
Lifetime alcohol or drug use	67	A6.2
Lifetime marijuana use	61	A6.2
Lifetime very drunk or high (7 or more times)	39	A6.7
Lifetime drinking and driving involvement	25	A6.11
Current alcohol or drug use [¶]	48	A6.5
Current marijuana use [¶]	45	A6.5
Current heavy drug use [¶]	35	A6.5
Current heavy alcohol use (binge drinking) [¶]	12	A6.5
Current alcohol or drug use on school property [¶]	20	A6.8
Harmfulness of occasional marijuana use ^B	26	A6.12
Difficulty of obtaining marijuana ^C	13	A6.13

Notes: Cells are empty if there are less than 10 respondents.

[#]*Excludes prescription pain medication, tranquilizers or sedatives, diet pills, and prescription stimulant.*

[¶]*Past 30 days.*

^B*Great harm.*

^C*Very difficult.*

Table A6.2
Summary of AOD Lifetime Use

	NT %
Alcohol	58
Marijuana	61
Inhalants	10
Cocaine, methamphetamine, or any amphetamines	6
Heroin	0
Ecstasy, LSD, or other psychedelics	16
Prescription pain medication (opioids)	22
Tranquilizers or sedatives	19
Diet pills or other prescription stimulant	20
Cold/cough medicines or other over-the-counter medicines to get “high”	19
Any other drug, pill, or medicine to get “high”	13
Any of the above AOD use	67
Any illicit AOD use to get “high”[#]	67

Notes: Cells are empty if there are less than 10 respondents.

[#]Excludes prescription pain medication, tranquilizers or sedatives, diet pills, and prescription stimulant.

na—Not asked of middle school students.

Table A6.3
Lifetime AOD Use

	NT %
Alcohol (one full drink)	
0 times	42
1 time	7
2 to 3 times	16
4 or more times	35
Marijuana (smoke, vape, eat, or drink)

Any other drug, pill, or medicine to get “high” or for reasons other than medical	
0 times	87
1 time	3
2 to 3 times	1
4 or more times	9

Question HS A.63/MS A.56: During your life, how many times have you used the following?... Any other drug, pill, or medicine to get “high” or for reasons other than medical.

Notes: Cells are empty if there are less than 10 respondents.

Table A6.4
Lifetime Marijuana Consumption

	NT %
<i>During your life, how many times have you used marijuana in any of the following ways...</i>	
Smoke it?	
0 times	43
1 time	4
2 to 3 times	7
4 or more times	45
In a vaping device?	
0 times	43
1 time	6
2 to 3 times	6
4 or more times	46
Eat or drink it in products made with marijuana?	
0 times	51
1 time	10
2 to 3 times	7
4 or more times	32

Question HS A.67-69/MS A.60-62: During your life, how many times have you used marijuana in any of the following ways... Smoke it?... In a vaping device (vape pens, mods, portable vaporizers)?... Eat or drink it in products made with marijuana?

Note: Cells are empty if there are less than 10 respondents.

Table A6.5***Current AOD Use, Past 30 Days***

	NT %
Alcohol (one or more drinks of alcohol)	22
Binge drinking (5 or more drinks in a row)	12
Marijuana (smoke, vape, eat, or drink)	45
Inhalants	1
Prescription drugs to get “high” or for reasons other than prescribed	9
Other drug, pill, or medicine to get “high” or for reasons other than medical	4
<i>Any drug use</i>	45
<i>Heavy drug use</i>	35
<i>Any AOD Use</i>	48
Two or more substances at the same time	16

Question HS A.73-79/MS A.66-70: During the past 30 days, on how many days did you use... one or more drinks of alcohol?... five or more drinks of alcohol in a row, that is, within a couple of hours?... marijuana (smoke, vape, eat, or drink)?... inhalants (things you sniff, huff, or breathe to get “high”)?... prescription drugs to get “high” or for reasons other than prescribed?... any other drug, pill, or medicine to get “high” or for reasons other than medical?... two or more substances at the same time (for example, alcohol with marijuana, ecstasy with mushrooms)?

Notes: Cells are empty if there are less than 10 respondents.

Heavy drug use was calculated based on pattern of combined current drug use on three or more days (marijuana, inhalants, prescription pain medicine to get “high” (high school only), or any other illegal drug/pill to get “high”). na—Not asked of middle school students.

Table A6.6***Frequency of Current AOD Use, Past 30 Days***

	NT %
Alcohol (one or more drinks)	
0 days	78
1 or 2 days	13
3 to 9 days	3
10 to 19 days	3

Hispanic or Latino	8
American Indian or Alaska Native	
Asian	
Black or African American	36
Native Hawaiian or Pacific Islander	
White	38
Mixed (two or more) races	7

Note: Cells are empty if there are less than 10 respondents.

10. Gender Breakdowns

Table A10.1

School Supports and Engagement by Gender

	NT	
	Female	Male
	%	%
<i>School Environment</i>		
Total school supports [‡]	53	51
Caring adults in school [‡]	63	63
High expectations-adults in school [‡]	71	64
Meaningful participation at school [‡]	24	27
<i>School Connectedness</i> [†]	54	57
<i>Academic Motivation</i> [†]	66	66
<i>Promotion of parent involvement in School</i> [†]	46	57

Notes: Cells are empty if there are less than 10 respondents.

[†]Average percent of respondents reporting “Agree” or “Strongly agree.”

[‡]Average percent of respondents reporting “Pretty much true” or “Very much true.”

Table A10.2

Select Perceived Safety, Harassment, Alcohol and Other Drug Use, and Physical/Mental Health Measures by Gender

	NT	
	Female	Male
	%	%
Perceived Safety at School		
Feel safe or very safe at school	68	68
Harassment/Bullying at School		
<i>During the past 12 months at school, have you been...</i>		
harassed/bullied for any of the five reasons?	33	18
harassed/bullied for any reason?	40	18
Current ATOD Use		
<i>During the past 30 days, did you...</i>		
have at least one drink of alcohol at school?	10	5
use cigarettes?	3	0
use vape products?	35	21
have at least one drink of alcohol?	20	24
use marijuana?	55	37
Physical and Mental Health		
Sleep deprivation (less than 8 hours)	74	78
Chronic sad or hopeless feelings, past 12 months	68	32
Seriously considered attempting suicide, past 12 months	32	16

Note: Cells are empty if there are less than 10 respondents.

Alcohol and Other Drugs (AOD) Module

1. Module Sample

Table B1.1

Student Sample for AOD Module

		NT ^A
<i>Student Sample Size</i>		
Target sample		70
Final number		67
Response Rate		96%

Note: ^ANT includes continuation, community day, and other alternative school types.

2. Summary of Key Indicators

Table B2.1

Key Indicators of Alcohol and Other Drug Use

	NT %	Table
Alcohol and Marijuana Consumption Patterns		
Usually drank until felt it a lot	9	B3.3
Usually used marijuana or other drugs until felt it a lot	28	B3.4
Consequences of AOD Consumption		
Caused one or more problems	29	B4.2
Caused one or more dependency-related experiences	26	B4.3
Supports to Reduce AOD Use		
Very likely to find help at school for quitting or reducing use	27	B5.2
Strong Personal Disapproval of AOD Use		
Having one or two drinks of any alcoholic beverage nearly every day	32	B7.1
Trying marijuana once or twice	12	B7.1
Using marijuana once a month or more	14	B7.1

Note: Cells are empty if there are less than 10 respondents.

3. Alcohol, Tobacco, and Marijuana Consumption Patterns

Table B3.1

Age of Onset – AOD Use

	NT %
Alcohol (one full drink)	
Never	37
10 years or under	15
11-12 years old	7
13-14 years old	19
15-16 years old	16
17 years or older	4
Marijuana (smoke, vape, eat, or drink)	
Never	43
10 years or under	4
11-12 years old	15
13-14 years old	19
15-16 years old	15
17 years or older	3
Any other illegal drug or pill to get “high”	
Never	74
10 years or under	0
11-12 years old	2
13-14 years old	11
15-16 years old	12
17 years or older	2

Question HS/MS B.1, 4, 5: About how old were you the first time you tried any of these things?... A drink of an alcoholic beverage (other than a sip or two)... Marijuana (smoke, vape, eat, or drink)... Any other illegal drug or pill to get “high.”

Note: Cells are empty if there are less than 10 respondents.

Table B3.2***Age of Onset – Tobacco Use***

	NT %
Smoked part or all of a cigarette	
Never	76
10 years or under	4
11-12 years old	7
13-14 years old	4
15-16 years old	7
17 years or older	0
A vape product such as an e-cigarette, vape pen, or mod	
Never	48
10 years or under	3
11-12 years old	9
13-14 years old	15
15-16 years old	24
17 years or older	1

Question HS/MS B.2, 3: About how old were you the first time you tried any of these things?... Part or all of a cigarette... A vape product such as an e-cigarette (JUUL), vape pen, or mod.

Note: Cells are empty if there are less than 10 respondents.

Table B3.3***Usual Alcohol Consumption Level***

	NT %
I don't drink alcohol	55
Just enough to feel it a little	24
Enough to feel it moderately	12
Until I feel it a lot or get really drunk	9

Question HS/MS B.6: If you drink alcohol, how much do you usually drink?

Note: Cells are empty if there are less than 10 respondents.

Table B3.4***Usual Marijuana Consumption Level***

	NT %
I don't use drugs	48
Just enough to feel a little high	7
Enough to feel it moderately	16
Until I feel it a lot or get really high	28

Question HS B.7: If you use marijuana or other drugs, how "high" (stoned, faded, wasted, trashed) do you usually like to get?

Note: Cells are empty if there are less than 10 respondents.

Table B3.5***Vaping Substances***

	NT %
I've never used a vaping device or e-cigarette	44
Nicotine or tobacco substitute	32
Marijuana or THC	43
Amphetamines, cocaine, or heroin	3
A flavored product without nicotine, alcohol, or other drug	16
Any other product or substance	3
I was not sure what was in the vaping device or e-cigarette	10

Question HS B.31/MS B.25: Have you ever used a vaping device or e-cigarette to consume any of the following? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

4. Reasons for and Consequences of AOD Consumption

Table B4.1

Reasons for AOD Use in the Past 12 Months

	NT %
Does not apply, I haven't used alcohol, marijuana, or other drugs in the past 12 months.	45
To experiment (try using)	10
To get high	40
To have a good time with friends	39
To fit in with a group you like	4
Because of boredom	21
To relax	34
To get away from problems	27
Because of anger or frustration	25
To get through the day	19
Because it made you feel better	19
To seek deeper insights and understanding	16
None of the above	9

Question HS B.8/MS B.7: Have you used alcoholic beverages, marijuana, or other drugs in the past 12 months for any of the following reasons? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table B4.2***Problems Caused by AOD Use***

	NT %
Does not apply; I've never used alcohol or drugs	50
I've used alcohol or drugs but never had any problems	23
Have problems with emotions, nerves, or mental health	11
Get into trouble or have problems with the police	6
Have money problems	8
Miss school	12
Have problems with schoolwork	8
Fight with others	8
Damage a friendship	12
Physically hurt or injure yourself	8
Have unwanted or unprotected sex	6
Forget what happened or pass out	15
Been suspended from school	11
<i>One or more problems</i>	29

Question HS B.9: Has using alcohol, marijuana, or other drugs ever caused you to have any of the following problems? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table B4.3***Alcohol or Other Drug Use Caused Negative Experiences***

	NT %
Does not apply; I have not used alcohol or drugs	56
I use alcohol or drugs but have not experienced any of these things	23
Found you had to increase how much you use to have the same effect as before	17
Frequently spent a lot of time getting, using, or being hung over from using alcohol or other drugs	11
Used alcohol or drugs a lot more than you intended	14
Used alcohol or drugs when you were alone	18
Your use of alcohol or drugs often kept you from doing a normal activity	9
You didn't feel OK unless you had something to drink or used a drug	9
Thought about reducing or stopping use	18
Told yourself you were not going to use but found yourself using anyway	11
Spoke with someone about reducing or stopping use	18
Attended counseling, a program, or group to help you reduce or stop use	5
<i>One or more negative experiences</i>	26

Question HS B.10: If you use alcohol, marijuana, or another drug, have you had any of the following experiences? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table B4.4

Likelihood of Suspension, Expulsion, Transfer Because of AOD Use/Possession

	NT %
Very likely	37
Likely	25
Not likely	13
Don't know	24

Question HS B.13: In your opinion, how likely is it that a student will be suspended, expelled, or transferred if caught on school property using or possessing alcohol or other drugs?

Notes: Cells are empty if there are less than 10 respondents.

5. Supports to Reduce AOD Use

Table B5.1

Needed Counseling for Use

	NT %
No, I never used alcohol or other drugs	48
No, but I do use alcohol or other drugs	47
Yes, I have felt that I needed help	5

Question HS B.11: Have you ever felt that you needed help (such as counseling or treatment) for your alcohol or other drug use?

Note: Cells are empty if there are less than 10 respondents.

Table B5.2

Likelihood of Finding Help at School for Quitting or Reducing Use

	NT %
Very likely	27
Likely	25
Not likely	18
Don't know	30

Question HS B.12: In your opinion, how likely is it that a student could find help at your school from a counselor, teacher, or other adult to stop or reduce using alcohol or other drugs?

Note: Cells are empty if there are less than 10 respondents.

Table B5.3

Talked with Parent About AOD Use

	NT %
No	58
Yes	42

Question HS B.19/MS B.13: During the past 12 months, have you talked with at least one of your parents or guardians about the dangers of alcohol or drug use?

Note: Cells are empty if there are less than 10 respondents.

6. Availability

Table B6.1

Sources for Obtaining Alcohol

	NT %
At school	11
At parties	30
At concerts or other social events	11
At their own home	24
From adults at friends' homes	14
From friends or another teenager	29
Get adults to buy it for them	20
Buy it themselves from a store	20
At bars, clubs, or gambling casinos	3
Other	15
Don't know	53

Question HS B.14/MS B.8: How do most students at your school who drink alcohol usually get it? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table B6.2***Sources for Obtaining Marijuana***

	NT %
At school	31
At parties	30
At concerts or other social events	15
At their own home	27
From an adult acquaintance	27
From friends or another teenager	39
Buy it at a marijuana dispensary	24
At bars or clubs	4
Other	18
Don't know	51

Question HS B.15/MS B.9: How do most kids at your school who use marijuana usually get it? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for “mark all that apply” items.

7. Influences on ATOD Use

Table B7.1

Personal Disapproval of AOD Use

	NT %
Having one or two drinks of any alcoholic beverage nearly every day	
Neither approve nor disapprove	56
Somewhat disapprove	12
Strongly disapprove	32
Trying marijuana once or twice	
Neither approve nor disapprove	82
Somewhat disapprove	6
Strongly disapprove	12
Using marijuana once a month or more regularly	
Neither approve nor disapprove	77
Somewhat disapprove	9
Strongly disapprove	14

Question HS B.16-18/MS B.10-12: How do you feel about someone your age doing the following?... Having one or two drinks of any alcoholic beverage nearly every day... Trying marijuana once or twice... Using marijuana once a month or more regularly.

Note: Cells are empty if there are less than 10 respondents.

Table B7.2***Parent Disapproval of ATOD Use***

	NT %
Take one or two drinks of alcohol nearly every day

Very wrong	40
Wrong	24
A little wrong	22
Not at all wrong	14

Question HS B.26-30/MS B.20-24: How wrong would your close friends feel it would be if you did the following?... Take one or two drinks of alcohol nearly every day... Smoke tobacco... Use vape products such as e-cigarettes (JUUL), vape pens, or mods... Use marijuana (smoke, vape, eat, or drink)... Use prescription drugs to get high or for reasons other than prescribed.

Note: Cells are empty if there are less than 10 respondents.

Table B7.4

Heard, Read, or Watched Any Anti-ATOD Messages, Past 12 Months

	NT %
No	37
Yes	63

Question HS B.20/MS B.14: During the past 12 months, have you heard, read, or watched any messages about not using alcohol or drugs?

Note: Cells are empty if there are less than 10 respondents.

Drug-Free Communities (DFC) Module

1. Module Sample

Table G1.1

Student Sample for DFC Module

		NT ^A
<i>Student Sample Size</i>		
Target sample		70
Final number		64
Response Rate		91%

Note: ^ANT includes continuation, community day, and other alternative school types.

2. Prescription Drug Use

Table G2.1

Prescription Drug Use, Past 30 Days

	NT %
No	94
Yes	6

Question HS/MS G.2: During the past 30 days, have you used prescription drugs not prescribed to you?

Note: Cells are empty if there are less than 10 respondents.

3. Disapproval of Prescription Drug Use

Table G3.1

Parental Disapproval of Prescription Drug Use

	NT %
Very wrong	66
Wrong	22
A little wrong	6
Not at all wrong	6

Question HS/MS G.4: How wrong do your parents feel it would be for you to use prescription drugs not prescribed to you?

Note: Cells are empty if there are less than 10 respondents.

Table G3.2

Peer Disapproval of Prescription Drug Use

	NT %
Very wrong	36
Wrong	31
A little wrong	19
Not at all wrong	14

Question HS/MS G.5: How wrong do your friends feel it would be for you to use prescription drugs not prescribed to you?

Note: Cells are empty if there are less than 10 respondents.

4. Perceived Harm from Marijuana and Prescription Drug Use

Table G4.1

Perceived Risks Associated with Marijuana and Prescription Drug Use

	NT %
Smoke marijuana once or twice a week	
Great risk	17
Moderate risk	27
Slight risk	21
No risk	35
Use prescription drugs that are not prescribed to them	
Great risk	53
Moderate risk	21
Slight risk	16
No risk	10

Question HS/MS G.1, 3: How much do you think people risk harming themselves physically or in other ways if they smoke marijuana once or twice a week?... How much do you think people risk harming themselves physically or in other ways if they use prescription drugs that are not prescribed to them?

Note: Cells are empty if there are less than 10 respondents.

Military-Connected School Module

1. Module Sample

Table J1.1

Student Sample for Military-Connected School Module

		NT ^A
<i>Student Sample Size</i>		
Target sample		70
Final number		69
Response Rate		99%

Note: ^ANT includes continuation, community day, and other alternative school types.

2. Family Military Connections and Supports

Table J2.1

Family Military Connections

	NT %
Do you have someone in your family who is currently in the military?	
No	72
Yes	22
Don't know	6
Do you have someone in your family who is in the military now or sometime in the last 10 years?	
No	60
Yes	28
Don't know	12
Who in your family is currently in the military? (You can mark more than one answer if you have more than one family member in the military.)[†]	
No one in my family is in the military	68
Father	9
Mother	1
Brother or sister	9
Grandparent or other relative	9
Don't know	9

Question HS/MS J.1, 2, 39: Do you have someone in your family (like a parent, grandparent, brother, sister) who is currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)?... Who in your family is currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)? (You can mark more than one answer if you have more than one family member in the military.)... Do you have someone in your family (like a parent, grandparent, brother, sister) who is in the military now or sometime in the last 10 years?

Notes: Cells are empty if there are less than 10 respondents. [†]Total percentages may exceed 100% for “mark all that apply” items.

Don't know	3

Question HS/MS J.26, 27, 29: In the last 30 days, how often did you... feel nervous?... feel that you do not have much hope?... feel like you are not important?

Note: Cells are empty if there are less than 10 respondents.

Table J5.4***Worry About a Family Member Deployed Outside USA***

	NT %
No one in my family is in the military	61
Not true	9
A little true	13
Pretty much true	3
Very much true	4
Don't know	9

Question HS/MS J.38: How true is each of these sentences?... I worry about a family member who is serving in the military outside the USA.

Note: Cells are empty if there are less than 10 respondents.

6. Family Relocation and Deployment

Table J6.1

Family Relocation and Impact on Schooling

	NT %
In the last five years, how many times did you change your school because your family had to move?	
I did not change schools	43
Once	18
Twice	19
Three times	7
Four times	4
More than four times	4
Don't know	4
If you changed schools, did you have any difficulties because your course credit earned at your previous school was not counted in your new school?	
I did not change schools.	38
I did not have any problems.	22
I had minor problems.	19
I had serious problems when I changed schools.	4
Don't know	16

Question HS/MS J.31, 32: In the last five years, how many times did you change your school because your family had to move?... If you changed schools, did you have any difficulties because your course credit earned at your previous school was not counted in your new school?

Note: Cells are empty if there are less than 10 respondents.

Table J6.2***Deployment of Family Members Outside USA, Last 10 Years***

	NT %
Never	65
Once	9
Twice or more	18
Don't know	8

Question HS/MS J.33: As far as you can remember, how many times in the last 10 years did any member of your family leave home and serve (deploy) outside the USA?

Note: Cells are empty if there are less than 10 respondents.

Table J6.3***Travel Experience***

	NT %
I have traveled a lot and have seen many interesting places.	
Not at all true	15
A little true	31
Pretty much true	19
Very much true	30
Don't know	4

Question HS/MS J.8: How true is each of these sentences about you and your family?... I have traveled a lot and have seen many interesting places.

Note: Cells are empty if there are less than 10 respondents.

7. Future Plans

Table J7.1

Desire to Join Military

	NT %
When I grow up, I would like to join the military.	
Not at all true	54
A little true	10
Pretty much true	6
Very much true	13
Don't know	16

Question HS/MS J.12: How true is each of these sentences about you and your family?... When I grow up, I would like to join the military (Army, Navy, Marines, Air Force, National Guard, or Reserves).

Note: Cells are empty if there are less than 10 respondents.

8. Disaggregated Results by Military-Connected Family Status

Table J8.1

Student Sample for Military-Connected School Module, by Military-Connected Family Status

	NT ^A
<i>Student Sample</i>	
Military-connected family	6
Non-military-connected family (other)	63

Notes: Military-connected students are respondents who report that either or both their father or mother is currently in the military. Non-military-connected or other students are respondents who provide data to the Military-Connected School Module but indicate that neither their father nor mother is currently in the military.

^ANT includes continuation, community day, and other alternative school types.

Table J8.2***Family Support by Military-Connected Family Status***

	Mil. %	NT Other %
My family is very close and we support each other.		
Not at all true		13

Appendix

CHKS Content Overview, 2019-20

This brief guide to key CHKS Core Module indicators is designed to help survey users more easily understand and interpret their findings.¹ References are provided to the tables in CHKS reports where results for the indicators discussed can be found. References are also made to other relevant CHKS reports, factsheets, and resources that can be downloaded from the CalSCHLS website (calschls.org) for further information. What Works Briefs that provide guidance on best practices related to areas assessed by the survey are available from the California Safe and Supportive Schools website (californias3.wested.org/tools/wwb).

Special attention is directed toward indicators related to the requirements of California's Local Control and Accountability Plans (LCAP).² For a summary of state-level LCAP-related baseline CHKS data, see Factsheet #15.³

MAIN CONTENT FOCUS: SCHOOL CLIMATE AND THE NEEDS OF THE WHOLE CHILD

The main purpose of the CHKS Core Module is to assess indicators of school climate, pupil engagement, and student supports, all three key priorities required of LCAP. It seeks to provide schools with essential data to determine the degree to which they provide the conditions and supports that all youth need to succeed in school and developmentally thrive. Twenty-nine items assessing seven domains are used to calculate a School Climate Index (SCI) score that is included in a *School Climate Report Card* that districts can request at the district and school level.⁴ The items used in the SCI assess school connectedness, developmental supports (e.g., caring adult relationships), and safety, including bullying and victimization.

School climate, as measured by the CHKS, is strongly related to student performance on standardized academic tests. Data for high school students show that as CHKS SCI scores increased—as the schools became safer, more supportive, and more engaging—test performance increased as well.⁵

In a ground-breaking analysis, a positive school climate was a distinguishing characteristic of California secondary schools that “beat the odds” academically and consistently performed better on the state's standardized tests than *would be predicted* based on the characteristics of their students (i.e., comparing schools with similar student demographics). The higher (more positive) the CHKS SCI, the greater the probability there was for beating the odds. School climate was more strongly associated with beating the odds than a school's level of personnel resources.⁶

In addition, the CHKS Core Module provides data to help understand the degree to which schools address the needs of the Whole Child. CHKS data show that California secondary schools made greater progress in raising standardized test scores over a one-year period when they had higher percentages of students

¹ To see how local results compare with state averages in California, download a copy of the latest Biennial State CHKS report (calschls.org/reports-data/#biennial_statewide_student_reports). The Biennial State data are derived from a randomly-selected, representative state sample. County level reports are also available on the CHKS website. Biennial State CHKS data can also be examined interactively on the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard/).

² For a guide to how CalSCHLS survey items align with LCAP indicator requirements, download Helpful Resources for Local Control and Accountability Plans at calschls.org/resources/#survey_content_guides.

who reported: (1) being less engaged in risky behaviors such as substance use and violence; (2) being more likely to eat nutritiously and exercise; and (3) experiencing caring adult relationships and high expectations at school.⁷ These results suggest that addressing the health and developmental needs of youth is a critical component of a comprehensive strategy for meeting accountability demands for improved academic performance.

GRADE-LEVEL PATTERNS

More than twenty years of survey administration has demonstrated that as youth progress through secondary school, they become: (1) less likely to report feeling connected to school and be academically motivated; and (2) more likely to report truancy, involvement in substance use, and chronic sadness and hopelessness. Here are some additional grade-level patterns in CHKS data:

- **Seventh graders** report the highest rates of harassment and victimization, as well as participation in a physical fight and seeing a weapon on campus.
- **Ninth graders** report the lowest rates of developmental support and perceived safety.
- **Nontraditional (continuation school) students** report risk behavior (e.g., binge drinking, fighting at school) prevalence rates at least twice those of 11th graders in traditional comprehensive high schools.⁸ They also exhibit lower perceived school safety, school connectedness, and developmental supports. Continuation school students are a highly vulnerable population in need of a wide range of academic, social, emotional, and behavioral supports and intervention services.⁹

DEMOGRAPHIC CHARACTERISTICS AND POPULATION SUBGROUP DIFFERENCES (Section 3)

A wide range of indicators of the demographic and background characteristics of the survey respondents help users gain a better sense of how representative the survey sample is compared to the student population overall. They also enable users to analyze how survey results vary by important subgroups in the school and help them to identify, and target programs for, youth most in need. School districts can use these data to meet the LCAP requirement to demonstrate actions across state priorities in regard to socioeconomically disadvantaged students, English learners, and foster youth, as well as other indicators such as race/ethnicity, homeless youth, and LGBTQ youth.

In the standard CHKS report, breakdowns for selected key indicators are provided by race/ethnicity and gender. For selected key indicators, the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard/) can be used to display subgroup differences by gender, race/ethnicity, parental education, parent military status, homeless status, afterschool participation, gender identity, and sexual orientation. Results can also be displayed for English learners, free and reduced-priced meal eligible students, and foster youth—three important LCAP priority subgroups. Districts/schools can also subscribe to the District CalSCHLS private data dashboard to disaggregate their CHKS results by demographic subgroups for each school (call 888.841.7536 or email CalSCHLS@wested.org).

⁷ Hanson & Austin. (2003). Download data.calschls.org/resources/FACTSHEET-3.pdf

⁸ In interpreting the results for 11th graders, note that many youth who are most disengaged and involved in high risk behaviors may have already dropped out of school or did not participate in the survey because of truancy or absenteeism.

⁹ Austin, Dixon, & Bailey. (2007). Download data.calschls.org/resources/FACTSHEET-7.pdf

Racial-Ethnic Identification

Respondents self-report their identification with six racial/ethnic groups plus mixed (two or more) race. In one study of CHKS data, both academic performance and school well-being—the degree to which students feel safe at, supported by, and connected to the school—varied consistently and persistently across schools by racial/ethnic groupings.¹⁰ They were lowest in schools with large proportions of African American and Hispanic students, as well as in low-income schools. Controlling for socioeconomic status and other school demographic characteristics reduced these racial/ethnic group differences, but they still remained. This suggests that school climate factors related to student well-being may also play a role in the racial/ethnic achievement gap. One strategy to close the gap may be to enhance learning supports that foster caring adult relationships, high expectations, meaningful participation, safety, and connectedness in schools serving large proportions of low-income African American and Hispanic students.

In the majority of cases, with notable exceptions for Asians, *the racial/ethnic gaps in performance, engagement, perceived support, and safety are greater within-schools than between-schools*.¹¹ African American, Latino, and Asian students feel less safe, engaged, and supported than their White peers *within the same school*. Inequities in these factors, for the various racial/ethnic groups, can possibly contribute to the achievement gap. Further, these findings suggest that practices designed to ensure equal access to academic resources, opportunities, learning supports, and promotion of common experiences may be effective in ameliorating the gap.

Foster Care Youth

Compared to youth who live with their parents, foster care youth report much higher rates of substance abuse, poor school attendance and grades, more violence-related behaviors, more harassment, and higher depression risk.¹² They were also more likely to be low in caring adult relationships and total developmental support.

Sexual Orientation and Gender Identity

Lesbian, gay, bisexual, transgender, and questioning or queer (LGBTQ) youth are at elevated risk for bullying and violence victimization, mental health problems, drug and alcohol use, and exhibiting poor performance in school.^{13 14} For example, analysis of the latest Biennial CHKS data indicate that LGBTQ youth¹⁵ are:

- about 30 percentage points more likely than non-LGBTQ youth to experience harassment and bullying at school;
- 30-to-40 percentage points more likely to exhibit chronic sadness;
- 2-to-3 times more likely to smoke cigarettes, binge drink, and to have been drunk or high at school; and
- receive substantially fewer social supports from teachers and peers at school than their counterparts who do not identify as LGBTQ.

¹⁵ See calschls.org/reports-data/dashboard/

Because of such disparities, it is important to examine disparities across LGBTQ and non-LGBTQ youth to identify needs and support the development of practices that promote the healthy development and safety of all youth.

SCHOOL PERFORMANCE, SUPPORTS, AND ENGAGEMENT (Section 4)

A major focus of the CHKS is providing data to gauge the level of pupil engagement, an LCAP state priority on which districts are required to show improvement. Enhancing student engagement has been identified as the key to addressing problems of low achievement, high levels of student misbehavior, alienation, and high dropout rates.¹⁶ A 2009 Gallup study found that a one-percentage-point uptick in a school's average student engagement was connected to a six-point increase in reading achievement and eight points in math.¹⁷ CHKS and other surveys consistently show that as youth progress through the school system, indicators of engagement decline.

It is important to look at engagement from three perspectives: behavioral, emotional, and cognitive. The CHKS provides data on all three types. As discussed below, the Academic Motivation scale and self-reported grades provide insight into cognitive engagement; the School Connectedness scale into emotional engagement; and attendance and truancy data into behavioral engagement. Other behavioral engagement indicators on the survey include substance use at school and violence perpetration. Research shows that student engagement is malleable and that all three types of engagement are influenced by the level to which students perceive the school as having a positive environment.

The CHKS Developmental Supports scales provide insight into whether students experience in their school the three protective factors (caring relationships, high expectations, and opportunities for meaningful participation) that characterize a positive school climate and are linked to school connectedness and positive academic, behavioral, and health outcomes. Other school climate factors assessed are the level of parent involvement and the quality of the school physical environment, both also LCAP priorities. The likelihood that students will be motivated and engaged is increased to the extent that their teachers, family, and friends effectively support their purposeful involvement in learning and in school.

Self-Reported Grades

The CHKS asks students to indicate what grades they mostly received in school in the past 12 months. Although self-reports are not as accurate as actual report card data, they provide a general sense of the school performance of the survey respondents from their self-perception. To learn more about the factors that might be causing poor performance, request a CHKS report showing how all the survey results vary by level of performance (call 888.841.7536 or email CalSCHLS@wested.org).

Academic Motivation

A four-item scale gauges student academic motivation by asking how strongly they agree that they try hard to do well on schoolwork, try hard because they are interested in the work, work hard to understand new things at school, and always try to do better. On the 2015-17 State CHKS, the percentage of students strongly agreeing with the questions on this scale declined from 45 percent in 7th grade to 28 percent in 11th.¹⁸

¹⁶ Wang, M-T, & Eccles, J. (2013). School context, achievement motivation, and academic engagement: A longitudinal study of school engagement using a multidimensional perspective. *Learning and Instruction*, 28, 12-23.

In order to achieve rigorous academic goals, students need not only a challenging and engaging curriculum, but they need to be emotionally connected to their learning. Student perceptions of the school environment and their degree of school connectedness influence their achievement motivation. But students may be behaviorally and/or emotionally invested in a given activity without actually exerting the necessary mental effort to understand and master the knowledge, craft, or skill that the activity promotes. This scale provides insight into the overall level of that mental effort.

In addition, the supplementary School Climate Module includes an Academic Mindset and Learning Engagement scale and a series of questions about supports for learning and academic rigor.

Absenteeism and Truancy

Before good teachers with quality curriculums and engaging activities can improve academic performance, the students have to show up. The CHKS provides data to identify what proportion of respondents are at risk of chronic absenteeism (missed 2 or more days during the past 30 days), what were the reasons for absences, and the level of truancy. Users can request reports looking at the characteristics of youth based on absenteeism and truancy indicators to guide efforts to improve the LCAP pupil engagement priority (call 888.841.7536 or email CalSCHLS@wested.org).

Poor attendance is a marker of a wider variety of other problems, including low school connectedness and learning engagement. Both the US Department of Education and the California Office of the Attorney General have launched initiatives designed to raise awareness about and combat chronic absenteeism, generally defined as missing 10 percent of school days. According to a report by Attendance Works, the nation's large and persistent achievement gaps are rooted in a largely hidden crisis of chronic absenteeism, especially among low-income and minority children.¹⁹

Biennial State CHKS data indicate that the most common reasons for being absent in secondary school, after illness, are generally not getting enough sleep and anxiety or stress, followed by being behind in school work, and being bored or uninterested in school, another good indicator of disengagement.²⁰

Truancy has been identified as one of the most powerful predictors of both poor achievement and delinquency.²¹ Students who are chronically absent are also more likely to use drugs and have deviant friends. Among high school staff statewide, truancy is the top-rated of fourteen potential school problems assessed by the California School Staff Survey.

Developmental Supports

Research shows that when schools (or families or communities) provide three developmental supports—**caring adult relationships, high expectations, and opportunities for meaningful participation**—students are more likely to report more positive academic, social-emotional, and health outcomes, including higher grades, school connectedness, attendance, and perceived safety. CHKS measures these supports using multi-item scales. Results overall suggest that the great majority of students do not receive

sufficient levels of support and that the supports received are lower in high school than in middle school, even though student need for them is arguably higher.^{22 23 24 25 26 27}

School Connectedness

School connectedness is one of the indicators of school climate that a California school district must address in its LCAP. Research shows that school connectedness is associated with multiple positive academic, social-emotional, and health outcomes.²⁸ It also shows that youth who feel safe at school, experience caring adults, and have opportunities for engagement and other developmental supports are more likely to feel connected to the school. The CHKS five-item School Connectedness scale is an important differentiator between low-performing and high-performing high schools and has value as an indicator of school quality. The online Query CalSCHLS system (calschls.org/reports-data/query-calschls/) enables examination of how key survey indicators vary by school connectedness.

School connectedness appears to have increased in California in the second half of the last decade, but it still declines markedly after elementary school. A substantial majority of high school students are not highly connected to their schools. On the 2015-17 State CHKS, the average percentage of students strongly agreeing to these scale questions declined from 28 percent in 7th grade to 15 percent in 11th, a decline similar to that found for the Academic Motivation scale.²⁹ This may be related at least in part to their lower levels of developmental support. Prior analyses have indicated that the lowest rates of both connectedness and test scores are in low-income schools.^{30 31}

Parent Involvement

Parent involvement, including promoting parental participation in school programs, is one of the LCAP state priorities. A three-item scale assesses student perceptions (level of agreement) of three components of parent involvement: teachers communicating with parents about what students are expected to learn in class, parents feeling welcome to participate at this school, and school staff taking parent concerns seriously. The same questions also are asked on the staff and parent surveys so that perceptions can be compared across all three stakeholder groups. A large and growing body of evidence has linked school success to the manner and degree to which a school communicates with parents, engages them both in school activities and education, and fosters a school climate that parents perceive as warm, inviting, and helpful.³²

Facilities and Physical Environment

As an indicator of student perceptions of the school's physical environment, the CHKS includes a question asking students how much they agree the school "is usually clean and tidy." Additional questions are included in the supplementary School Climate Module. An analysis of 2015/16 data from the questions on both modules found that a plurality of students report that their school facilities are in good condition,

but a non-trivial minority of students were dissatisfied with the condition of their school facilities.³³ Between 20 percent and 25 percent of students disagree or strongly disagree on the quality of the physical environment items. Almost one-third of schools serving 11th graders were categorized as having low quality physical environments based on student reports on the clean and tidy item. Student perceptions of the quality of their school's physical environment were strongly related to student achievement.

SCHOOL VIOLENCE, VICTIMIZATION, AND SAFETY (Section 5)

The CHKS asks students a wide range of questions to ascertain the scope and nature of physical and verbal violence and victimization that occurs on campus, as well as vandalism, and the overall level of school safety.³⁴ Physical violence and weapons on campus have long been a major public concern. Equally disruptive are the uncounted acts of bullying, teasing, and other nonviolent misbehavior among youth, such as substance use and sales on campus.³⁵ These behaviors adversely affect not only students' ability to learn and willingness to attend school, but also the overall school environment, the ability of teachers to teach, and the willingness of adults to enter the teaching profession.^{36 37 38}

Perceived Safety

Perceived safety is another indicator that districts/schools are required to monitor as part of their LCAP school climate priority. School safety is more than the antithesis of violence. Perceived school safety is psychological as well as physical. Feelings of insecurity can have multiple sources, not all of which correctly reflect the level of danger and violence on a school campus, such as verbal bullying. Both physical and psychological safety are essential for high quality teaching and learning. It is a key factor in students feeling connected to school. Another indicator important for attendance is the percentage of students who report missing school because they didn't feel safe (Table A4.4).

State CHKS data show that the percentage of students who perceive their school as safe or very safe has consistently been markedly lower for 7th than 9th grade.³⁹ If students report low levels of perceived school safety, further examination of all the indicators related to bullying and victimization is warranted. Consider conducting follow-up student voice and feedback sessions such as focus groups or Student Listening Circles and integrating questions on why students do not feel safe.⁴⁰

Harassment and Victimization

Most of the safety-related questions on the survey assess victimization. Because a relatively small number of students can victimize a large number of their peers, victimization questions provide important insight into the overall school climate. Nonviolent harassment in any form—threats, intimidation, rumors, and ostracism—can instill a sense of vulnerability, isolation, frustration, and fear among its victims, leading to engagement in health risk behaviors or avoidance behaviors such as missing school and social isolation. This type of misbehavior, vastly more common than any other, ruins the school day for many students. In

³³ Hanson & Austin. (2016). Download [calschls.org/docs/facilities122216.pdf](https://data.calschls.org/docs/facilities122216.pdf)

³⁴ The CHKS also includes two violence-related questions that are not school based: the frequency students experienced cyberbullying and whether they are gang members.

Bruised Inside (2000), the National Association of Attorneys General describes harassment by peers as one of the two causes for kids to express anger using guns, knives, and fists.⁴¹

The CHKS asks about the frequency with which students experienced any bullying/harassment related to six bias-related categories (gender, race/ethnicity, disability, sexual identity, religion, immigrant status), as well as for any other reason (Table A5.2). About three-in-ten secondary students report experiencing some harassment in the past year on the State CHKS, with the percentages declining between 7th and 11th grades.⁴² Analyses show that victims of harassment are more likely to not feel safe at, and connected to, school; to have higher truancy; and to experience lower developmental (resilience) supports at school.⁴³ ⁴⁴ They report higher rates of fighting and weapons possession at school, as well as risk of depression. Students who report bias-related harassment, particularly for disability and sexual orientation, have poorer well-being than students who were only harassed for other reasons.

Different forms of verbal harassment at school are assessed by asking students about: mean rumors or lies; sexual-related jokes, comments, or gestures; being made fun of because of looks or speech; and, more generally, being made fun of, insulted or called names. Physical victimization is assessed by questions about having been pushed/shoved, threatened with harm or injury (without or without weapon), and being afraid of being beaten up. Students are also asked whether they have ever been in a physical fight as a measure of general violence.

The supplementary School Climate Module includes Bullying Prevention and Respect for Diversity scales to provide insight into what the school is doing to reduce the problem.

Vandalism and Weapons

Two other safety-related areas assessed by the survey are school vandalism and weapons possession. Students are asked whether they damaged school property or had their property damaged at school and whether they carried a knife or other weapon to school or observed someone else doing these things. Overall, weapons possession is not common. Statewide, only about two percent of secondary students report carrying a gun and 4-5 percent report carrying another weapon.⁴⁵ About 16 percent of 7th and 9th graders report seeing someone carrying a weapon compared to 13 percent of 11th graders.

SUBSTANCE USE AND MENTAL HEALTH (Sections 6-8)

Two important barriers to learning, positive youth development, and health are assessed: substance use and mental health.

Alcohol and Other Drug Use (Section 6)

The misuse of alcohol and other drugs (AOD) continues to be among the most important issues confronting the nation. For schools, the problem is particularly relevant. Years of research have shown that adolescent substance use is closely connected to academic performance and contributes to raising the level of truancy and absenteeism, special education, disciplinary problems, disengagement and dropout rates, teacher turnover, and property damage.

⁴¹ Horn, D. M., National Association of Attorneys General., & Washington (State). ⁴⁵ Austin, Hanson, Polik, & Zheng. (2018). Download data.calschls.org/resources/Biennial_State_1517.pdf

Reflecting this, on the California School Staff Survey, 39 percent of high school staff statewide reported that alcohol and drug use are a moderate to severe problem at their school.⁴⁶

Alcohol and Other Drug Use at School (Section 6)

AOD use at school is especially troubling. This is behavior that threatens not only the user's learning ability but also the school's efforts to educate all youth. It also is an indirect indicator of school disengagement. An analysis of CHKS data found that substance use and intoxication at school, being offered drugs at school, and lifetime intoxication were significantly related to changes in California achievement test scores one year later.⁴⁷ Schools with proportionately large numbers of students who reported these behaviors exhibited smaller gains in test scores than other schools.^{48 49}

Cigarette Smoking (Section 7)

Students who report smoking cigarettes are significantly more likely than those who do not to engage in alcohol and other drug use, be involved in violence and gang membership, and experience school-related problems and disengagement. To a lesser extent, students who smoke are also more likely to be victims of violence and harassment, feel unsafe at school, and experience incapacitating sadness and loneliness. These results suggest that efforts to reduce student smoking may be more successful if embedded in approaches that address a broad range of risk behaviors and problems.^{50 51}

Mental Health (Section 8)

The CHKS Core provides two measures for assessing mental health among students: (1) whether they experience chronic, incapacitating sadness or hopelessness; and (2) whether they ever contemplated suicide. Students who experience chronic sadness, compared to their peers who do not, are at elevated risk of a wide range of educational, health, social, and emotional problems, including lower school attendance, performance, and connectedness.⁵² They also report lower levels of the developmental supports in their schools and communities that have been shown to mitigate these problems. Similar findings are found among youth who have contemplated suicide.⁵³

CHKS data also show that students who report bias-related harassment, particularly for disability and sexual orientation, have poorer overall mental health than students who are harassed for other reasons or not harassed. Students who report any harassment are about twice as likely to experience chronic sadness/hopelessness than their non-harassed peers.^{54 55}

See also the percentage of students who report missing school because they "felt very sad, hopeless, anxious, stressed, or angry." In addition, the supplementary School Climate Module includes a Social and Emotional Supports scale that provides insight from students on what the school does to help promote mental health and foster of social-emotional competencies.
