PREFACE

This report provides school-level results on the key indicators of school climate and student well-being from this district's 2018-19 administration of the *California Healthy Kids Survey* (CHKS), presented in tables organized by topic. The tables compare the results reported by students at schools in the district. For more details about the survey, its content, and using the data, please see the Preface and Appendix II in the district's main report.

This school-level report on key CHKS indicators is made available courtesy of the California Department of Education (CDE) to help districts more specifically identify, understand, and address the needs of students in each of their schools. For resources and guidance in improving school climate, visit CaliforniaS3.wested.org and subscribe to CDE's free *School Climate Connection Newsletter*.

Survey results provided by students in grades 7, 9, 11, or non-traditional (NT) schools are displayed. Aggregated results on the key indicators are reported in Table 2.1 on the district's main report.
